DETAILED ACTION

1. It would be of great assistance to the Office if all incoming papers pertaining to a filed application carried the following items:

1. Application number (checked for accuracy, including series code and serial no.).
2. Group art unit number (copied from most recent Office communication).
3. Filing date.
4. Name of the examiner who prepared the most recent Office action.
5. Title of invention.

Continued Prosecution Application

2. The request filed on 10/29/99 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/002,648 is acceptable and a CPA has been established. An action on the CPA follows.

Claim Rejections - 35 USC § 112

3. Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The added limitation to claims 1 and 11 "*Wherein the first encoded pseudo-noise code corresponds to the value of a signal to be transmitted*" is not supported by the specification. (See page 5, lines 19-21)

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2734

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2 and 8, 11-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Rosen (4,972,480).

Rosen disclose a communication system comprising the step of creating an encoded pseudo noise signal and spreading the information signal by modulating the information signal with the encoded pseudo noise signal. Demodulating the information signal with the encoded PN code. The encoded pseudo noise signal is the modified part of the pseudo noise signal and corresponds to the user.(See col.1, lines 23-43 and figs.3 and 4)

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 3,5-6,9-10,16,19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rosen.

Rosen disclose the subject matter of the invention substantially as claimed. Rosen differs from the claimed invention in that he is silent in terms of the encoded pseudo noise code being same as the pseudo noise code with one bit inverted. However, it would have been obvious to one

Art Unit: 2734

of ordinary skill in the art to design the encoded pseudo noise code of Rosen to be a pseudo noise code with one bit inverted since there is no new or unexpected result. Rosen also teaches demodulating the information signal with the encoded PN code and the pseudo noise signal corresponds to the user.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to T.Ghebretinsae whose telephone number is (703) 305-4777. The examiner can normally be reached on Monday-Friday from 8:30 a.m. to 6:00 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Chin, can be reached on (703) 305-4714. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-5091.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-4700.
